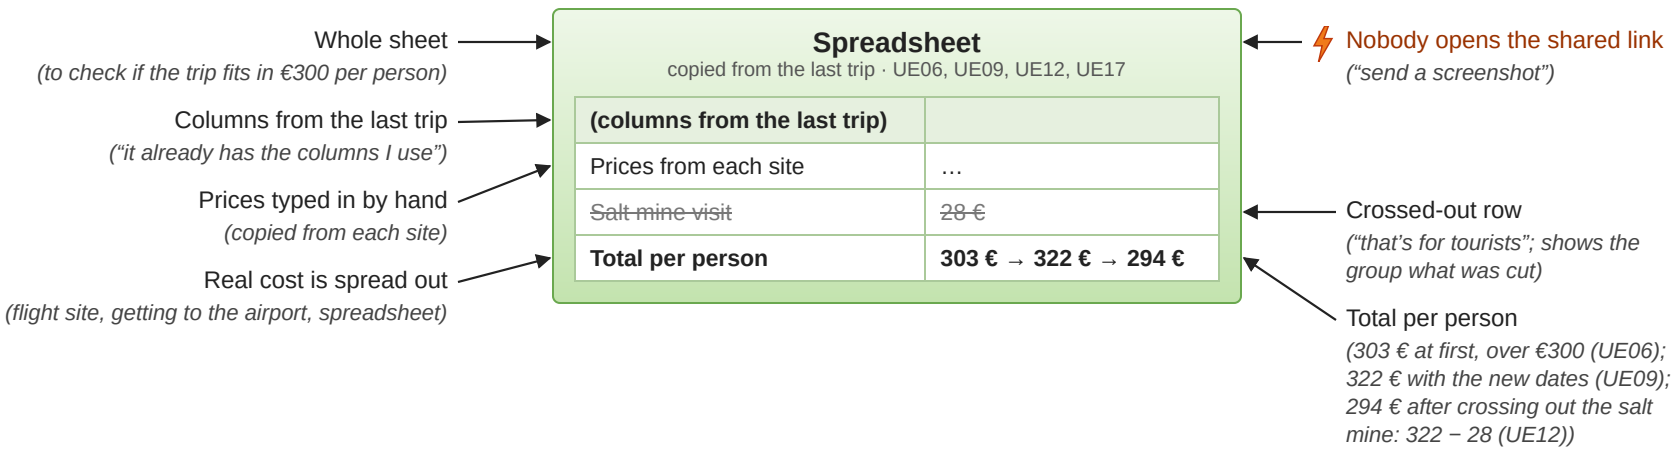
Artifact models: U0 (group organizer)

The things U0 used to plan the Kraków trip. Only what the U0 interview says.

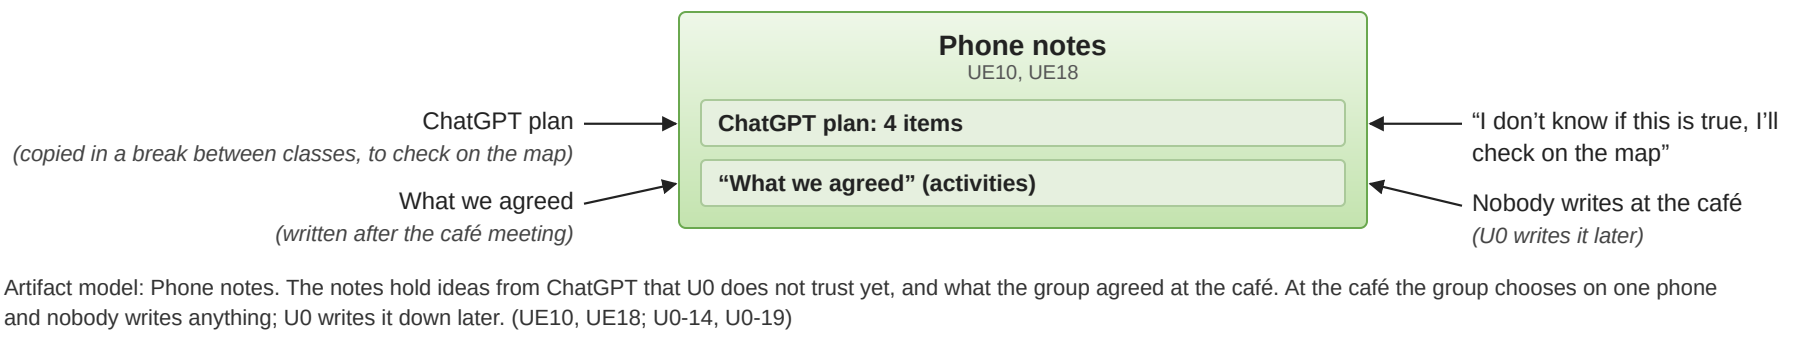
Breakdown: where the artifact gets in the way of the work *(italics) = how the part is used or why*

Codes show where each item comes from: UE / AE = interview notes; U0- / A0- = team notes after the interview; wrap-up = summary at the end of the interview.

Presentation (layout, colours, fonts) is not shown: the interview recorded no screenshots, so each model shows only the parts U0 showed or talked about.



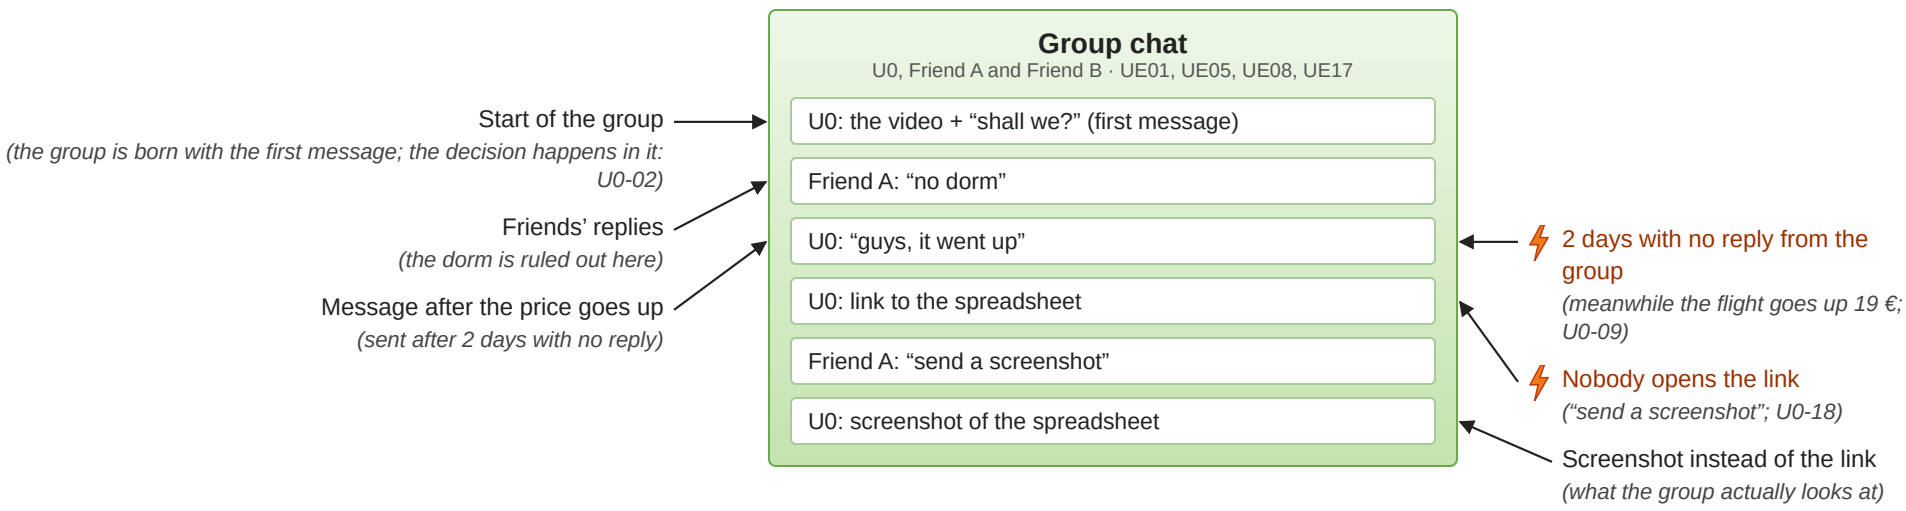
Artifact model: Spreadsheet. U0 copies the spreadsheet from the last trip, so the columns are already known. Prices from each site are typed in by hand. The total is 303 € per person at first (UE06), 322 € after the search with the new dates (UE09), and 294 € after the salt mine visit (28 €) is crossed out (UE12). The crossed-out row shows the group what was cut. The real cost is spread between the flight site, getting to the airport and the spreadsheet. U0 shares the link, but nobody opens it; the group asks for a screenshot. (UE06, UE09, UE12, UE17; U0-04, U0-07, U0-17, U0-18)



Artifact model: Phone notes. The notes hold ideas from ChatGPT that U0 does not trust yet, and what the group agreed at the café. At the café the group chooses on one phone and nobody writes anything; U0 writes it down later. (UE10, UE18; U0-14, U0-19)

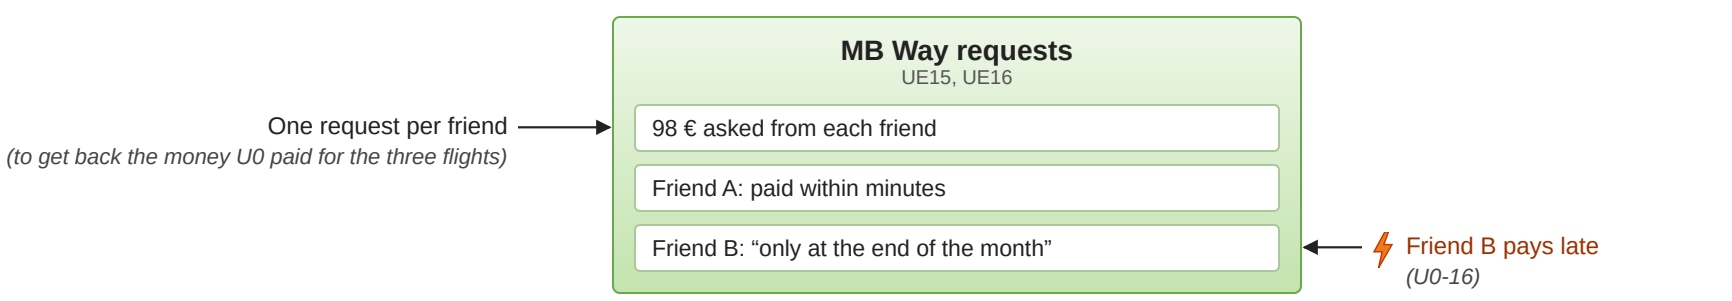
Artifact model: Map list. U0 checks the ChatGPT ideas on the map (2 kept, 1 dropped) and adds a street food place from the saved video to the map list. (UE10, UE11; U0-13, U0-14)

Artifact model: Saved video. The video starts the trip: U0 saves it and sends it to a new group with Friend A and Friend B. Later, U0 opens it again to get the street food place. (UE01, UE11; U0-01, U0-13)



Artifact model: Group chat. U0 creates the group with the first message: the video and “shall we?”. Decisions happen in the chat: Friend A rules out the dorm. After 2 days with no reply, U0 writes “guys, it went up”. U0 shares the spreadsheet link, but nobody opens it; Friend A asks for a screenshot and U0 sends one. (UE01, UE05, UE08, UE17; U0-02, U0-09, U0-18)

Artifact model: Flight payment page. When U0 redoes the payment step, a hold bag fee (+34 €) appears that was not shown before: “nobody tells you this”. U0 decides to take only a small backpack. Only the parts U0 talked about are shown. (UE07; U0-08)



Artifact model: MB Way requests. U0 pays for all three flights first, with a debit card, and then asks each friend for 98 €. Friend A pays within minutes; Friend B answers “only at the end of the month”. (UE15, UE16; U0-16)
