Sequence model: U0 (group organizer)

Trip: 4 nights in Kraków with Friend A and Friend B. Budget: €300 per person, everything included. U0 shows us, step by step, how the trip was planned.

Primary intent
Plan a cheap trip that the whole group accepts, for €300 or less per person.

Secondary intents (whole sequence)
- Choose on price, but always think about the friends (wrap-up, U0 agreed)
- Not be pushed into deciding: “this is to pressure me” (UE14, U0-10)

⬭ Trigger / outcome ⬭ Trigger (mid-way) 🟩 Step ▨ Another person's action ◆ Decision ☐ Path not taken / not seen ⚡ Breakdown - - - - Loop

Codes show where each item comes from: UE / AE = interview notes; U0- / A0- = team notes after the interview; wrap-up = summary at the end of the interview.

Trigger
At night, on the sofa, on the phone, U0 sees a video: “Kraków for 150 €”
UE01

1. Get the idea and start the group

Intent
Get the friends to join

Saves the video
UE01

Creates a group chat and sends the video: “shall we?”
UE01

Friend A replies at once. Friend B: “depends on the price; near the weekend is easier”
UE02

2. Choose the flight

Intent
Find a cheap flight U0 can get to

Secondary intent
- *Search by price and dates, not by place: “whole month” (U0-05)*

Trigger (mid-way)
Tuesday night: flight search
UE03

Only the time is recorded; what prompted the search is not (UE03).

Opens a flight search site: “nearest airport” (“there’s no airport in my city”), dates “whole month”
UE03

Compares 3 sets of dates
UE04

Stops for ≈20 s at the cheapest flight (6:50 am): “How do I get to the airport at 5 am?” Checks train + metro (≈13 € each way) and bus (8 €, +1 h)
UE04

⚡ The cheapest flight means being at the airport very early, with no transport (U0-06)

Can U0 get to the airport at 5 am?

yes

6:50 am flight (not chosen)

no

Chooses the 11:30 am flight
UE04

3. Choose where to stay

Intent
Find a cheap place the group accepts

Secondary intent
- *Think about the friends (wrap-up)*

Compares a dorm (14 € a night) and a private room for 3 (24 € per person a night)
UE05

Friend A in the chat: “no dorm”
UE05

Takes the private room
UE05

4. Add up the cost

Intent
Check if it fits in €300 per person

Secondary intent
- *Start from an old spreadsheet, not a blank one (U0-04)*

Copies the spreadsheet from the last trip
UE06

Types in the prices from each site by hand: total 303 €
UE06

Over €300 (UE06).

On the flight payment page, a bag fee appears (+34 €)
UE07

⚡ Hidden cost, only shown at payment: “nobody tells you this” (U0-08)

U0 redoes this step for us; the flights are paid later (UE15).

Decides to take only a small backpack
UE07

5. Agree on dates with the group

Intent
Close the deal before the price changes

Trigger (mid-way)
2 days with no reply from the group
UE08

Checks again: the flight is now 19 € more
UE08

⚡ The group answers slowly and the price goes up (U0-09)

Writes to the group: “guys, it went up”
UE08

Friend B can only go from a certain Friday
UE09

Searches again with the new dates: total 322 €
UE09

Loop: the flight search is done again (dashed arrow, left).

6. Find things to do and cut costs

Intent
Get back to €300 or less

Secondary intent
- *Get ideas from the AI, then check them on the map (U0-14)*
- *Show the group what was cut (U0-17)*

Trigger (mid-way)
Break between classes, on the phone
UE10

Asks ChatGPT for a “cheap 4-day Kraków plan”. Copies 4 items into notes
UE10

“I don’t know if this is true, I’ll check on the map.”

Checks them on the map: keeps 2, drops 1
UE10

Adds the street food place from the video to the map
UE11

Crosses out the salt mine (28 €, “that’s for tourists”): 294 €
UE12

7. Answer the mother

Intent
Tell the mother where U0 will sleep, as she asked

Trigger (mid-way)
The Sunday before, mother on the phone: “don’t spend what you don’t have; tell me where you’ll sleep”
UE13

Sends the mother the link to the place
UE13

8. Book

Intent
Get the price before it goes up

Secondary intent
- *Not be pushed by the site (U0-10)*

Trigger (mid-way)
The site says “only 2 rooms left!”
UE14

Closes the tab and opens another site to compare
UE14

“This is to pressure me.” Part of the culture (U0-10), so it goes in the cultural model, not here as a breakdown.

Pays for all three flights with own debit card
UE15

⚡ U0 pays for everyone first (wrap-up: “and having to pay it myself first”; U0-16)

Leaves the room to be paid on arrival, with a small deposit
UE15

9. Get the money back

Intent
Get the money back and align the group

Asks each friend for 98 € by MB Way
UE16

Friend A pays within minutes
UE16

Friend B: “only at the end of the month”
UE16

⚡ Friend B pays late (U0-16)

Shares the spreadsheet link in the group chat
UE17

⚡ Nobody opens the shared spreadsheet (U0-18)

Friend A: “send a screenshot”
UE17

Sends a screenshot of the spreadsheet
UE17

10. Choose activities

Intent
Choose activities together

Secondary intent
- *Have a note of what was agreed (U0-19)*

Trigger (mid-way)
The following week, the group meets at the café next to the university
UE18

They choose activities in an app, on one phone passed around
UE18

Nobody writes down what they decided.

Later, U0 writes “what we agreed” in the notes
UE18

Outcome
294 € per person, with a private room. “A classmate paid 360 € for almost the same” (proud)
UE19
